

3 Step Palm Branch

You will need...

- something to colour green with (crayons, markers, pencils... whatever you like)
- a pair of scissors
- access to a printer

Step 1: Print

Print off the second page of this document on regular printer paper.

Step 2: Colour

Use whatever greens you would like to fill in the solid leaf outline. (I used a bunch of different ones all over until all the gaps were filled)

Step 3: Cut

Cut along the dotted outline all the way around the leaf shape.

Tada!

All done! You did it!
